QA AUTOMATION / SOFTWARE QUALITY / ENTERPRISE DELIVERY

Michał Kochaniak

Senior QA Automation Engineer | Test Automation Engineer

Experienced QA Automation Engineer with a background spanning test automation, software quality, web applications, mobile applications, CI/CD tooling, reporting workflows, and hands-on development. Currently working at Bank Pekao S.A., supporting quality assurance across banking systems in web, mobile, and WebView environments. Combines enterprise QA practice with development experience in Java, JavaScript, and related web technologies, plus working knowledge of modern AI and LLM-related tools.

PROFILE SNAPSHOT

- Currently working at Bank Pekao S.A. in test and quality assurance.
- Strong background in QA automation across enterprise environments.
- Hands-on experience with web, mobile, and WebView-based systems.
- Blend of QA engineering, development, reporting, and delivery support.

CORE STRENGTHS

Test automation and software quality engineering	Web and mobile application testing
Regression, integration, and performance testing	Enterprise QA tooling and test management workflows
CI/CD support and delivery collaboration	Technical documentation and user-facing documentation
Frontend and web application understanding	Cross-functional work across QA, development, and support

CURRENT EXPERIENCE

Test and Quality Assurance Specialist — OCT 2019 - PRESENT

Bank Pekao S.A.

LODZ, POLAND | FULL-TIME | REMOTE

- Currently responsible for test and quality assurance activities in a banking environment.
- Working across web, mobile, and WebView-based application areas.
- Involved in test automation activities and quality support for enterprise-grade systems.
- Using tools and technologies including Java, Selenium, Jenkins, Jira, Git, Maven, Docker, Android Studio, Xcode, Gerrit, Bitbucket, SwiftUI, Carthage, and Tuist.
- Supporting quality processes related to mobile application development and internet applications in a regulated enterprise setting.
- Working daily with GitHub Copilot (Chat, agent mode, coding agent) and Microsoft 365 Copilot on Claude, GPT and Gemini models: test code, failure analysis, team prompts and agents, documentation.
